

Self-Centering, Steel Body, 3-Jaws Scroll Chucks

Replacement Jaws for Manual and Power Chucks

Good Day / Guten Tag / Dzień dobry!

We are very glad to offer you a wide assortment of self-centering lathe chucks as well as replacement jaws for manual and power chucks. Regardless if your chuck bears the POREBA's name or another manufacturer's, we have a product that will fit your needs. FN Poreba Ltd., has been established in 2011 in the former FUM Poreba gear manufacturing division, draws on over 200 years of machine tool and metal manufacturing tradition in the town of Poreba. I, Stanisław Cichoń have over 30 year's experience in the machine tool industry and I was the Managing Director of FUM Poreba in the year 1992-2000 and then later of Bison-Bial Chucks and Tooling Factory from 2002 to 2008. Now FN Poreba Ltd is continuing the tradition of precision engineering that has made the name Poreba synonymous with quality throughout the machine tool world, specializing in chucks and chuck components!

Sincerely Yours,

Stanisław Cichoń (CEO)
