

TAPS - MILLING CUTTERS - HOBS

Located in Chieri, in Corso Egidio Olia Nr. 2, Vergnano produces high precision cutting tools.

The new production facility, since 2002, covers an area of 39.000 m², of which 15.000 m² are factory space:

- 13.900 m² production area
- 800 m² of office accommodation
- 300 m² services building

Modern production techniques, large window areas as well as a complex air conditioning system allow the workers to remain in contact with the surroundings, in harmony with the company's modern environmentally friendly factory.

THE HISTORY

The company was founded in 1944 thanks to Mr. Luigi Vergnano, who began producing cutting tools and in particular milling cutters, gear cutting hobs and drills, towards the latter part of the war.

Taps became part of product range only later in 1949, soon becoming the largest part of the company's turnover together with hobs.

Over the years, Vergnano has constantly innovated its product range to meet the demands of a continuously evolving market while keeping a firm foothold in the honored tradition of the Vergnano brand.

1944 - The first production site

1950 - The plant in Corso Torino

1980 - Corso Torino 30 years later

2002 - The present plant in corso Olia

PRODUCTION METHODS

Raw material warehouse, modern heat treatment facilities, state of the art machine tools, PVD coating equipment: each phase of the production cycle is carried out and monitored in house and rigorously inspected to established quality standards.

 VERGNANO

The quality is guaranteed by constant monitoring:

- The metallurgical laboratory analyses material used and monitors the various heat treatments and surface finishes, such as ionic nitriding, steam tempering and PVD coating,
- The Company Metrology system oversees the control of all measuring instruments,
- 100% of all tools produced is carefully inspected by final inspection procedures.

PVD COATINGS

The coating department employs the most modern and advanced technology existing in the sector.

The range of coatings, developed to satisfy any machining requirement, are produced inside the company by highly skilled operators.

THE PRODUCTS

- Standard and special threading taps in steel and solid carbide
- Gear cutting hobs in HSSE PM and solid carbide
- Milling cutters
- Special cutters to customer specification

The workforce of Vergnano, together with a modern computerized system for product management allows the company to support promptly the needs of the customer.
